

Student Enrichment Education (SEE)

In my penultimate year at boarding school, I founded 'Student Enrichment Education' ('SEE') with the intention of bridging educational disparities in my local community by offering targeted enrichment courses in English, Mathematics, Science, and Classics to schools nearby.

I assembled a dedicated team of Grade 12 girls and provided high-quality academic support to students across eight schools in the local community, ensuring they receive additional resources to succeed in their studies. By giving this extra educational support beyond the classroom, we created an accessible and sustainable model for academic enrichment.

I am proud to share that the initiative has been a great success thus far and has now been integrated into Wycombe Abbey's enrichment program. It's rewarding to know that my legacy will continue, allowing future students to benefit and contribute, long after my time at school is over.
